

Enhanced 911

For Official Michigan Guidelines:

: https://www.michigan.gov/documents/msp/6bRevisions_MLTS_Guidelines_for_SNC_with_Karis_Law_FINAL_DRAFT_666216_7.pdf

Generally speaking, if your work space exceeds 7,000 square feet on a single floor OR your work space spans multiple floors or multiple buildings, Enhanced 911 Location information needs to be provided.

Why is location information so important?

There are many reasons a person calling 911 might not be able to communicate his or her specific location to the 911 dispatcher. Here are a few examples:

- Someone is choking, having a heart attack, or some other physical injury which prevents them from speaking.
- The caller is unable to talk or is fearful of speaking, for instance during a bank robbery at a branch location of a banking network.
- A person is disabled in some way that makes telephone communication difficult or impossible, such as being deaf or mute.
- The caller is a child or a visitor and doesn't know their address/location.
- The caller cannot speak English.

These are all real – and common – situations. By automatically providing specific location information through the 911 system, the 911 dispatcher is able to immediately dispatch fire, police, or EMS responders to the caller's location, even when the person is unable to communicate information.

How E911 Works

To better understand the purpose of new law governing MLTS operators, here is an outline of how 911 calling works in general.

To begin with an example: Fred Smith calls 911 from his desk phone in his office. The 911 dispatcher receiving the call sees the location of the caller's phone on a special computerized 911 phone screen (the 911 community calls that location information "ALI" for Automatic Location Identification). The 911 dispatcher sees something like this:

(989)-837-8790 12:23 09/17/19
Mercury Network
Support Building
2719 Ashman Street
Midland, MI 48640
Conference Room 138, Southeast Corner

When Fred called 911 it showed the dispatcher the number for call back, date and time of the call, the company he is located at, the building since there is more than one, the address and a more specific description of where he is at in the building. With this information they will be able to locate him quickly and easily.

How to update Enhanced 911

Requirements:

Direct Dial – an outside line reaching **one** extension.

Region – A designated area such as, a department, a suite, or a floor.

- The number that you update will be tied to 1 or more extensions.
- If your building is less than 7,000 square feet and single floor, Enhanced 911 is not needed for your location.
- If the building is more than 7,000 square feet or multiple floors, and only 1 phone line comes into the location, more phone lines will need to be ordered to facilitate the designated regions.

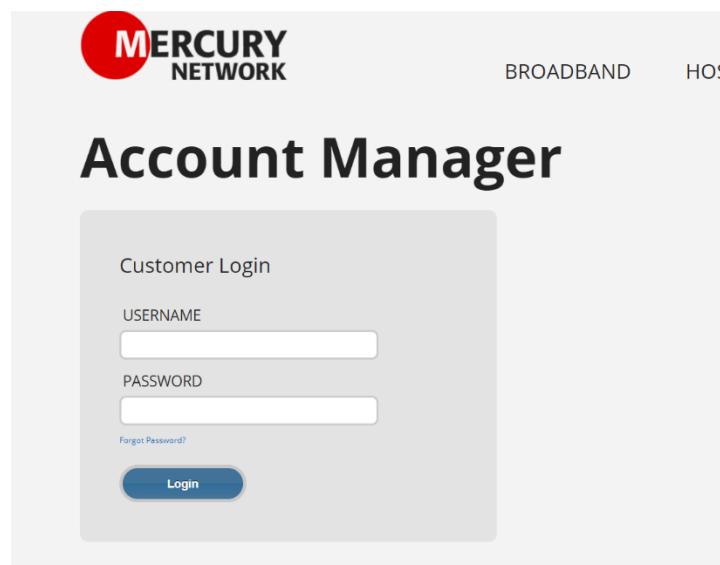

Examples:

- If you only have five phone numbers but 30 phones, you will need to group them together per region for each phone number. You could do one saying front of building, northwest side for one phone number, and back of building, south side for another.
- The same rule goes for a location that has 30 phone numbers but only five phones. You would designate five phone numbers to point to the phones, and add their E911 for only those five phone numbers. If you only have one phone number but four different locations within your building, you will need to order more numbers for E911 to work correctly. If you need more phone numbers for E911, please contact Mercury Network.
- If a user has a direct dial, the E911 info will need to be for where that extension's physical phone is located.

Procedure:

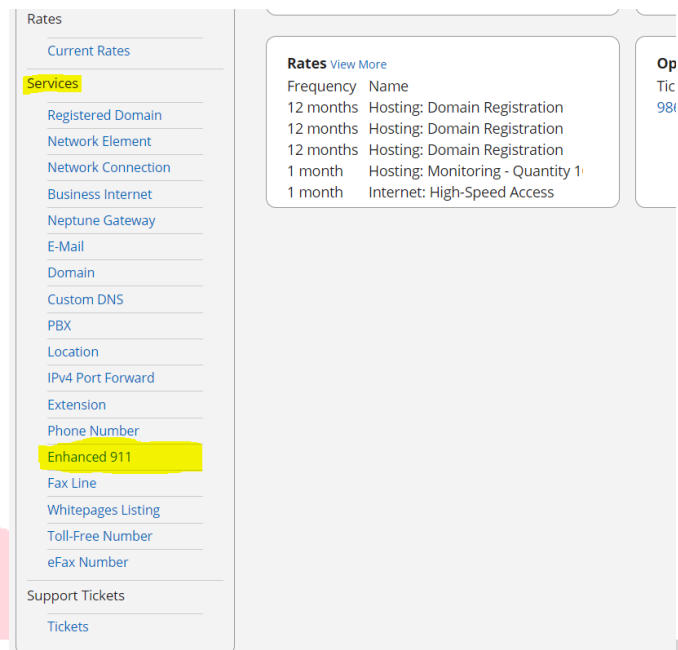

1. Log into Mercury Network Account Manager

URL: <https://accountmanager.mercury.net>

The screenshot shows the Mercury Network Account Manager login interface. At the top left is the Mercury Network logo. To the right are the words 'BROADBAND' and 'HOST'. The main heading is 'Account Manager'. Below this is a 'Customer Login' section with two input fields: 'USERNAME' and 'PASSWORD'. A 'Forgot Password?' link is located below the password field. At the bottom of the login section is a blue 'Login' button.

- Once you are logged into Account Manager you will need to go to Services-> Enhanced 911.

The screenshot shows the Account Manager interface. On the left, a sidebar menu lists various services, with 'Enhanced 911' highlighted. The main content area displays a table of services with columns for Frequency, Name, and Op. The table lists several services, including 'Hosting: Domain Registration' and 'Internet: High-Speed Access'.

Frequency	Name	Op
12 months	Hosting: Domain Registration	Tic
12 months	Hosting: Domain Registration	98
12 months	Hosting: Domain Registration	
1 month	Hosting: Monitoring - Quantity 1	
1 month	Internet: High-Speed Access	

- Click on the number and fill out the Enhanced Location. If you have multiple locations you will need to fill out the correct information for both locations.

Enhanced 911 Services

Service	Active
9203655499 Mercury Network, 1011 Washington St, Manitowoc, WI 54220	Y
9203655510 Mercury Network, 1011 Washington St, Manitowoc, WI 54220	Y
9206864800 Mercury Network, 1011 Washington St, Manitowoc, WI 54220	Y
9207690686 Mercury Network, 1011 Washington St, Manitowoc, WI 54220	Y
9207690687 Mercury Network, 1011 Washington St, Manitowoc, WI 54220	Y
9896981637 Mercury Network, 2719 Ashman St, Midland, MI 48640	Y
9897525737 Mercury Network, 2719 Ashman St, Midland, MI 48640	Y
9898373790 Mercury Network, 2719 Ashman St, Midland, MI 48640	Y
9899216964 Mercury Network, 2719 Ashman St, Midland, MI 48640	Y
9899355055 Mercury Network, 2719 Ashman St, Midland, MI 48640	Y
9893740420 Mercury Network, 2719 Ashman St, Midland, MI 48640	Y
9897525737 Mercury Network, 2719 Ashman St, Midland, MI 48640	Y

What you put for Enhanced Location should be meaningful to 911 dispatch and first responders. If you put SB for Support Building, they may not know what that means. Room numbers, floor number if multi-level, directions and descriptions are very helpful. It will let them know the floor, what direction and what they are looking for.

Example of Enhanced Location with Direct Dials:

Caller ID Name: MERCURY NETWORK

Listed Name: SUPPORT BUILDING (for locations that have more than one building)

Address: 2719 ASHMAN STREET, MIDLAND, MI

Enhanced Location: 4TH FLR, CONFERENCE ROOM, SOUTHEAST CORNER (this is what you enter into Enhanced Location field).

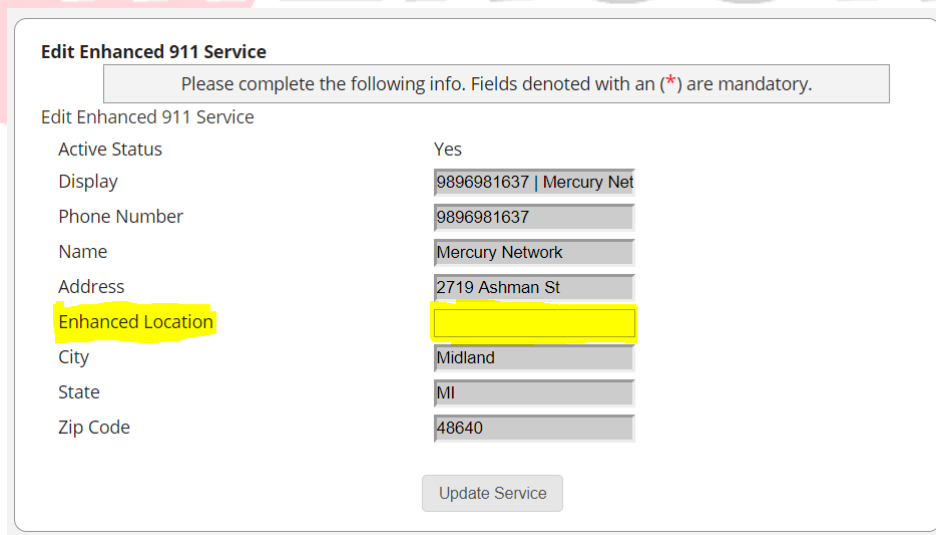

Example of Enhanced Location by Area:

Caller ID Name: MERCURY NETWORK

Address: 2719 ASHMAN STREET, MIDLAND, MI

Enhanced Location: LEFT STAIRCASE, UPSTAIRS HALLWAY, NORTHEAST SIDE (this is what you enter into Enhanced Location field).

4. Once you have filled it in, you will need to click Update Service to apply the change.

Edit Enhanced 911 Service

Please complete the following info. Fields denoted with an (*) are mandatory.

Edit Enhanced 911 Service

Active Status	Yes
Display	9896981637 Mercury Net
Phone Number	9896981637
Name	Mercury Network
Address	2719 Ashman St
Enhanced Location	
City	Midland
State	MI
Zip Code	48640

Update Service

5. Next you will need to go to Extensions to update the Emergency Caller ID. By updating the Emergency Caller ID it will add the Enhanced 911 location to the extension.
